## Cow Mats Features

High density foam made to sustain loads more than 600 kgs without losing its cushioning, providing soft and flexible surface for lying.

### Insulation

Acts as a thermal insulator which helps in maintaining body temperature contributing to improve overall health of a dairy cow.

Cow Mats do not absorb liquids, thus are easy to wash or clean and helps in keeping cattle hygiene.

## Slip Resistant

Textured pattern on cow mats provides required foothold while rising/sitting and reducing any possible injury or animal stress.

## Drainage

Underneath drain channel makes sure that bedding remains dry and prevents possible bacterial growth.

## Load Bearing Non-Absorbent
